Forecast for Wednesday 30 Jun 2021

Weather: Dry with clear spells during the early hours, but with some isolated fog patches and associated low cloud developing in valleys for a time around dawn. The morning will be dry with some sunny spells, but a few showers are likely to develop during the afternoon, these fading later to leave a dry evening with partly cloudy skies.

Chance of cloud free mountain/hill tops above 800m: 70% becoming 95% or better by midday.

Visibility: Locally poor in any valley fog around dawn, and with some shallow banks of low cloud briefly bringing poor visibilities on slopes above 300m as the fog lifts and clears. Otherwise generally very good visibility at low levels with some patchy cloud briefly developing on slopes above 800m mid-morning, this lifting clear of the summits by midday, and with only brief temporary deteriorations in any afternoon showers.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

UV levels will be high or very high, so with this strong sunshine during any sunny spells sun protection is advised.

Forecast for Thursday 01 Jul 2021

Weather: Some shallow mist and fog patches may form briefly in valleys around dawn, these lifting briefly into patchy low cloud before soon clearing to leave a fine morning with some spells of strong sunshine. Patchy cloud will bubble up late morning onwards, this perhaps giving an isolated afternoon shower. The evening will be dry with clear spells

Maximum wind: Mainly northerly 10mph.

Chance of cloud free mountain/hill tops above 800m: 70% at first, otherwise close to 100% through much of the day with little or no cloud below the summits.

Visibility: Locally poor in any valley fog around dawn, and with some shallow banks of low cloud briefly bringing poor visibilities on slopes above 300m as the fog lifts and clears. Otherwise generally very good with excellent clarity, with cloud holding clear of the summits and with any showers only bringing brief temporary deteriorations

Temperature: **Valleys:** Plus 11 Celsius becoming Plus 21 Celsius.
At 800m: Plus 12 Celsius.
Freezing level: Well above the summits.
